Job Description

HybridFuzion is a **Strategic Centre of Excellence**, **specialising in Supply Chain and Operations Management ecosystems**. We partner with organizations across various industries to solve complex business challenges, optimize processes, and achieve measurable value. Our expertise delivers high-impact solutions that enhance stability, capability, and predictability for our clients. Our services are designed for senior executives—such as a VP of Operations, Head of Supply Chain, or C-level officers in large corporations where the **SAP suite of products** forms the backbone of their operations.
We specialize in working with clients in the **mining**, **manufacturing**, **pharmaceutical**, **and retail sectors** who are struggling with complex, integrated challenges across their supply chain—whether they are rooted in people, process, or system inefficiencies. We are the partner for leaders who require a rigorous, results-focused approach to drive real-world transformation and value creation.
We are seeking a talented **Supply Chain Management professional** with the passion and vision to manage complex, client-facing projects for large corporate clients across Africa. You will be the partner for leaders requiring a rigorous approach to drive real-world transformation.

Why HybridFuzion

- **Executive Exposure:** You won't just be in the back office. You will partner directly with VPs and Heads of Supply Chain to solve complex, integrated challenges.
- **Cutting-Edge Tech:** Work at the forefront of digital transformation, utilizing the **SAP S/4 HANA** suite to drive stability and capability.
- **Global Reach, Local Base:** Enjoy a **remote-first delivery model** (home-based in JHB, Cape Town, or Durban) combined with 10–30% travel to international and local client sites.

The Role: Senior Supply Chain Management Consultant

As a key player in our Strategic Centre of Excellence, you will lead workshops, analyze business requirements, and implement value-driven solutions across the Mining, Manufacturing, Pharmaceutical, and Retail sectors.

You Bring

- **Base Location:** You must be based in **Johannesburg/Pretoria, Cape Town, or Durban**.
- **Experience:** 5+ years Senior in Supply Chain Management disciplines (Strategy, Sourcing, Planning, Operations).
- **Education:** A relevant Undergraduate degree (Business, Finance, Supply Chain Management). A Postgraduate degree in the same fields is a plus.

- **Certification:** Project Management Professional (PMP), Lean Six Sigma, and/or Management Consulting certifications are a plus.

Key Responsibilities

- **Client Engagement:** Engage customers to comprehensively understand unique business requirements.
- **Strategic Analysis:** Conduct research to develop value-driven, sustainable solutions for identified challenges.
- **Facilitation:** Lead strategic workshops and present solution proposals to stakeholders.
- **Implementation:** Implement sustainable business solutions and communicate progress against key deliverables.

Technology Stack Focus

We specialize where the SAP suite forms the backbone of operations. Experience in the following is a major advantage:

- SAP S/4 HANA & ECC
- SAP Extended Warehouse Management (EWM)
- SAP Transportation Management (TM)
- SAP FIORI
